PROFESSIONAL SUMMARY

Computer Science student and Python-focused developer experienced in Django, DRF, FastAPI, PostgreSQL, REST APIs, and real-world e-commerce systems. Built the A-One Collection Stores platform, including backend, admin, Seller Center, and Android app. Also experienced in AI/ML, data analysis, React/Next.js, React Native and RAG.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, Java
- **Backend & APIs:** Django, Django REST Framework, FastAPI, REST APIs, API Design
- **Data & AI:** Pandas, NumPy, Scikit-learn, NLP, Sentence-BERT, LangChain, RAG, PyMuPDF
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite
- **Frontend & Mobile:** React.js, Next.js, React Native
- **Tools:** Git, GitHub, Docker, Postman, Linux

PROFESSIONAL EXPERIENCE

Software Developer — SkinPal AI

Feb 2026 – Aug 2026 · Remote

- Work on backend and AI features for an AI skin-analysis app used by 13,000+ people daily.
- Built the RAG pipeline powering the product's AI skincare assistant.

Founder, Developer & Manager — A-One Collection Stores

2024 – Present · Bharatpur, Nepal

- Founded and manage an e-commerce platform serving customers across Nepal.
- Built the storefront, admin panel, Seller Center, backend services, and mobile app.
- Manage product, inventory, marketplace, and order workflows.

Web Developer — Khata Academy

Aug 2025 – Jan 2026 · Bharatpur, Nepal

- Built a Financial MIS for business data tracking and operational workflows.
- Developed Business Model Canvas and Persona Generator tools.

PROJECTS

A-One Collection Stores — E-Commerce Platform(Django, PostgreSQL, React/Next.js, Android)

- Built an e-commerce platform with storefront, admin panel, Seller Center, backend, and mobile app, including product, order, inventory, and seller workflows.
- [Live Store](#) · [Seller Center](#) · [Android App](#)

ResearchGap AI — Research Gap Identification (Python, Sentence-BERT, Scikit-learn, K-Means, Next.js)

- Built an AI platform using semantic embeddings and clustering to analyze research literature and identify potential research gaps.

Live: researchgap.tech

RAG From Scratch — RAG Engineering Project. (Python · LangChain · ChromaDB · Ollama)

Built a 13-module RAG system covering document ingestion, chunking, vector search, reranking, and conversational RAG.
